

# Bringing Nature into the Library: Feedback Survey, March 2022

Did you find the live plants and prints of trees in the library? Check all that apply

When selecting a place to study in the library, would you value a spot near a live plant or tree print? Check all that apply

Did you know that there are active workstations (bike and treadmill desks) on the main floor of the Library and the third floor of the Commons to promote non-sedentary activity while studying?

Do you have any other suggestions for how to make the library more welcoming or health promoting?

4. Do you have any other suggestions for how to make the library more welcoming or health promoting?

More plants!

More plants!!

plants with flowers would be nice :)

Snacks

More plants!

More plants please!

Plants, plants, more plants!!!

I love the library and think it's already very welcoming!

Defiantly keep with up with the plants. It's a great idea.

Free snacks

## Would you like to see more indoor nature initiatives on campus?

## If yes, please share any ideas you have for this!

If yes, please share any ideas you have for this! - Text

More plants! Trailing vines! Small trees!

Encourage people to name plants around campus

More plants in residence areas!

I think having live plants (or fake ones too honestly) make spaces feel more open and calming which is really beneficial when studying

A themed plant study room could be cool.

Indoor plants should be bring to all the buildings and common spaces. I have a plant near my desk in my research lab and I love to add more plants. I appreciate any initiative that can bring more plants and green close to people indoors and outdoors

Bring plants into other places on campus like hallways and other study spaces.
